

# GOSS WEB CENTER

Goss Web Center™ technology delivers all the advanced features web printers need to automate processes, maximize efficiency and integrate press systems within a comprehensive digital workflow. The modular system is based on CIP4/JDF and includes the software, the hardware and the connectivity for complete, customized control. An open architecture also makes it easy to link prepress, production, auxiliary and management components from Goss International and other suppliers.

## Features

- Goss Omni Presetting™**  
 Fast, simplified presetting of ink keys, web path and motorized folder functions; off-line job preparation prior to the run
- Goss Omni Reporting™**  
 Real-time and cumulative press status reports; access to production management data presented in numerical form or as charts/graphs
- Goss Omni Link™ (In/Out)**  
 CIP4/JDF based two-way communication between a company's Management Information System and the Goss Web Center System
- Goss Web Center Online™**  
 Remote access to press production data

<b>Goss Web Center</b>
