

# GOSS UNILINER

Uniliner® presses are derivatives of the Goss Universal press series, offering the pagination and versatility of a 4x2 format or the plate saving advantages of a 4x1 format from a common and proven design platform. Both Uniliner models can be configured for coldset or heatset production and provide the versatility for a wide range of newspaper and semi-commercial applications. The 4x2 and 4x1 towers can also be combined within a single press for added production flexibility.

## Features

- Solid stainless steel cylinders
- Shaftless drives
- Goss controls
- Direct presetting from prepress data
- Compact H-style tower
- Variable ink drum motion
- Open fountain or digital inking options
- Jaw folder accuracy
- Integrated web tension management
- Core tension reels
- Infeeds and outfeeds are standard
- Coldset and heatset configurations

	Uniliner		
	Cylinder format	4x2 and 6x2	4x1
	Speed	Up to 80,000 copies per hour
