

GOSS UNIVERSAL

The Universal® press series combines the latest technologies developed from Goss' experience with a long line of successful single-width presses. Flexibility is provided by two models with the ability to customize each to match speed, run length, pagination and deadline requirements.

Features

- Newspaper, semi-commercial and heatset capabilities
- One-plate and two-plate around models
- Horizontal or vertical web leads, depending on model
- Flexible configurations, including "T-90™"
- Folder choices to suit product requirements
- Shaftless drives throughout the press
- Award winning Digital inking option
- Semi automatic plate change option
- Automated web-width change option
- Automated webbing for minimum job-change times
- Advanced OPCS control system
- Wide range of auxiliaries for special applications
